

Alpaca / Wool Pressing Mats

Prairie Spirit Alpacas

The Alpacas are raised with love on a small farm in Alberta, Canada. The alpaca fleece is combined with wool from Alberta. The fleece/wool is sent to Mississauga, Ontario where it is felted and cut into mats. They are totally 100% Canadian made!

Why use an alpaca/wool pressing mat? The mat will enable you to ensure perfectly crisp pressed seams with little or no shifting. The alpaca/wool pressing mat has little “wet wool” odor compared to wool mats.

Care of your mat:

Do not place the mat directly on furniture. Even though your Alpaca/Wool mat is ½” thick, the intense heat you use when pressing may penetrate the mat and ruin the surface below. Place a protective underlay or use on your ironing board.

Do not spray Best Press or any starch directly on the mat. It is wise to make a cotton covering for the mat. This covering can be taken off and washed to remove excess spray.

You can spray water directly on the mat. Then use a dry iron to achieve perfectly pressed seams.

Do not place mat in a washing machine.
